

	CONTENTS	PAGE
CHAPTER 1.	INTRODUCTION	1-1
1.1	EXECUTIVE SUMMARY	1-1
1.2	PURPOSE	1-2
1.3	SCOPE	1-2
CHAPTER 2.	BACKGROUND	2-1
2.1	STATUTORY AND REGULATORY REQUIREMENTS	2-1
2.1.1	Federal Regulations	2-1
2.1.2	State Regulations (General)	2-3
2.1.3	Department of Defense	2-4
2.1.4	Regulations Relevant to Incineration	2-4
2.2	IMPACTS OF SOLID WASTE GENERATION	2-5
2.3	INVOLVEMENT OF BASE PERSONNEL	2-6
2.3.1	Landfill Operations	2-6
2.3.2	Resource Recovery	2-6
2.3.3	Hazardous Wastes	2-7
CHAPTER 3.	MANAGEMENT ISSUES	3-1
3.1	PLANNING IN SOLID WASTE MANAGEMENT	3-1
3.1.1	Management Objectives	3-1
3.1.2	Collection and Hauling Options	3-2
3.1.3	Collection Management	3-2
3.1.4	EPA Checklist	3-3
3.1.5	Labor Relations	3-3
3.1.6	Route Planning	3-5
3.1.7	Collection Personnel	3-6
3.1.8	Transfer Stations	3-9
3.1.9	Scrap Recycling	3-9
3.2	DISPOSAL ALTERNATIVES	3-10
3.2.1	Contracting	3-10
3.2.2	Sanitary Landfill	3-10
3.2.3	Construction Debris or Demolition Landfill	3-16
3.2.4	Incineration	3-16
3.2.5	Composting	3-18
3.2.6	Pyrolysis	3-18
3.2.7	Materials Recovery	3-18
3.2.8	Miscellaneous Disposal Methods	3-18
3.2.9	Health and Safety Requirements	3-20
3.2.10	Cost Considerations	3-20
3.3	PLAN DEVELOPMENT	3-20
3.3.4	Planning Steps	3-21
3.4	PLAN SELECTION AND IMPLEMENTATION	3-22
3.4.4	Developing Alternatives	3-22
CHAPTER 4.	ENGINEERING AND OPERATIONAL ISSUES	4-1
4.1	GENERATION OF SOLID WASTES	4-1
4.1.5	Solid Waste Types	4-2
4.1.6	Waste Quantities	4-2
4.2	TYPES OF TECHNOLOGIES	4-9
4.2.3	Handling and Storage at Generation Site	4-9
4.2.4	Collection of Solid Wastes	4-15

(Cont'd)

		PAGE
4.2.5	Transfer and Transport	4-29
4.2.6	Sanitary Landfill Design and Operation	4-36
4.2.7	Landfilling Methods and Operations	4-52
4.2.8	Volume Reduction	4-65
4.3	RESOURCE RECOVERY AND RECYCLING	4-65
4.3.6	Recovery of Resources	4-71
4.3.7	Development of Resource Recovery and Recycling Program	4-71
4.3.8	Qualified Recycling Program (QRP)	4-79
4.3.9	Implementation	4-82
4.3.10	Resource Recovery and Recycling Program (RRRP) Operations	4-84
4.3.11	Operational Checklist	4-90
4.3.12	Strategies for Success	4-90
4.3.13	Financial Constraints	4-91
4.3.14	Recycle Planning Board	4-91
4.3.15	Audits	4-93
4.3.16	Waste Segregation Options	4-93
4.3.17	Recovery of Energy	4-98
4.3.18	Composting	4-114
4.4	WASTES REQUIRING SPECIAL HANDLING	4-115
4.4.3	Used Oils and Solvents	4-116
4.4.4	Asbestos Wastes	4-116
4.4.5	Radioactive Wastes	4-116
4.4.6	Infectious and Medical Wastes	4-116
4.4.7	PCB Wastes	4-119
4.5	HAZARDOUS WASTES	4-119
4.5.1	Definition of Hazardous Wastes	4-121
4.5.2	Hazardous Wastes Identification	4-121
4.5.3	Responsibilities	4-122
4.5.4	Hazardous Waste Management Plan	4-124
4.5.5	Hazardous Waste Handling, Storage, and Disposal	4-125
4.5.6	Treatment Alternatives	4-126
4.5.7	Petroleum Products	4-127
4.5.8	Used Solvent Elimination Program (USE)	4-128
4.5.9	Hazardous Waste Minimization Program	4-129
4.5.10	Household Hazardous Waste	4-129
4.5.11	Education and Training	4-133
4.5.12	Regulatory Requirement	4-133
4.5.13	Training Programs	4-134

4-3-7C	Sample Economic Analysis	4-81
4-3-13A	Cycle Time for Submitting Goods to DRMO	4-92
4-3-16A	Magnetic Separator Designs	4-96
4-3-16B	Crane with Electromagnetic Hook	4-97
4-3-17A	Typical Waterwall Furnace Convection Boiler Systems Arrangement	4-99
4-3-17B	Refractory Furnace, Convection Boiler Incinerator	4-99
4-4A	Disposal Requirements for PCBs and PCB Items	4-120

	TABLES	PAGE
3-1A	Responsibilities of DoD Installations	3-11
4-1A	Average Composition of Solid Waste from Various Navy Installation Sources	4-3
4-1B	Average Daily Solid Waste Generation Rates from Military and Municipal Sources	4-4
4-1C	Typical Physical Compositions of Some Solid Waste Streams	4-5
4-2-3A	Data on the Types and Sizes of Containers Used for the Onsite Storage of Solid Wastes	4-11
4-2-3B	Typical Applications and Limitations of Containers Used for the Onsite Storage of Solid Wastes	4-12
4-2-4A	Typical Data on Container Capacities Available for Use with Various Collection Systems	4-21
4-2-4B	Typical Data on Vehicles Used for the Collection of Solid Wastes	4-22
4-2-5A	Transfer Station Types	4-33
4-2-6A	Solid Waste Landfill Design Checklist	4-45
4-2-6B	Sources of Existing Information	4-49
4-2-6C	Field Investigations for New Information	4-50
4-2-7A	Theoretical Volume of Water that Could Enter Completed Landfill Through 1 ft ² of Various Cover Materials in 1 Day	4-57
4-2-7B	Average Equipment Requirements	4-59
4-2-7C	Equipment Selection Guidance for Multiple Unit Sites	4-60
4-2-7D	Site Closure Checklist	4-63
4-2-8A	Solid Waste Processing Methods	4-66
4-2-8B	Compaction Equipment Used for Volume Reduction	4-67
4-2-8C	Important Design Factors in the Selection of Conventional Compaction Equipment	4-68
4-3-2A	Specifications for Fuel Oil Reclaimed (MIL-F-2495)	4-69
4-3-7A	Potentially Recyclable Materials	4-74
4-3-7B	Paperstock Markets and Prices	4-76
4-3-16A	Solid Wastes Separation Technique and Application Information for Centralized Separation Facilities	4-95
4-3-17A	Processes Used for the Energy Recovery from Solid Wastes	4-100
4-3-17B	Selected Emissions Standards for Municipal Waste Incinerators	4-102
4-3-17C	Emission Control Facilities and Equipment for Municipal Incinerators	4-103
4-3-17D	Comparative Air Pollution Control Data for Municipal Incinerators	4-104
4-3-17E	Principal Components in the Design of Incinerators	4-108
4-3-17F	Facility Safety Features	4-110
4-3-17G	Types and Capacities of Incinerators	4-112
4-4A	Designation of Infectious Waste	4-118
4-5A	Chemical Hazards in the Home	4-131
4-5B	Chemical Hazards in the Garage and Workshop	4-132
4-5C	Federal Regulations Requiring Training	4-134
